

Cells is a monthly, trainee-led seminar series sponsored by the Cell and Developmental Biology Graduate Program. Everyone is welcome to attend the seminars and the accompanying social (free food and drinks)!

Students: This is a great opportunity to share your exciting research and practice for upcoming presentations in front of an audience hailing from all fields!

Supervisors: The students really benefit from your questions and feedback after presentations, therefore we encourage you to attend! It's also a great opportunity to network with other faculty in the CELL Program.

Questions/comments? Feel free to email our organizers
