Dear CELL Grad Program Students,

**The new CELL minimum stipend for graduate students in both the MSc or the PhD program will be \$30,000/year effective January 1, 2023. This applies to all incoming and current graduate students in the program at that time.**

Please meet with your Supervisor to discuss how you will receive a minimum of \$30,000/year in support from all sources including competitive scholarships, TA'ships, and their operating budget starting in the New Year, 2023.

We will also keep our top-up policy in place (+\$3,000 per year to a student holding scholarships worth \$8,000 to \$15,999; +\$6,000 per year to a student holding scholarships worth \$16,000 or greater).

Please contact me if you have any questions about the stipend increase.

Thanks very much,

Cal Roskelley ([roskelly@mail.ubc.ca](mailto:roskelly@mail.ubc.ca))
